

Energise Your Community:

Realising your community energy potential
in East Renfrewshire

Wednesday 31st March 2010, 10am – 4pm
Carswell Hall, Montgomery Street, Eaglesham

Do you wish to learn about the potential benefits for your community or community group that **renewable energy** might bring? Do you wish to find ways to **reduce the running costs** for your community building? Or wish to lower your community's carbon emissions? Or perhaps you have ambitious plans to generate **long-term income** for your community by developing your own generation scheme, such as a community wind turbine or even a hydro project?

This conference will provide community group representatives with information on:

- Different forms of renewable energy generation
- The benefits of developing a community energy project
- What funding and support might be available to bring your idea to life

Community groups like yours from across Scotland – who have completed community energy projects – will present on the ups and downs they went through, and the lessons learned along the way.

The conference is free and is open to all community groups in East Renfrewshire. Places are limited so register today at:

www.community-energy-conference.org.uk

or call 07723 522536

Surgery places are also available where you can talk on a one-to-one basis about your idea. Register your interest in a surgery place online.

This project is being part-financed by the Scottish Government and the European Community [East Renfrewshire local action group] Leader 2009-2012 programme.
